

Practical Geometry (constructions) Ex 18.2 Q4

Answer :

Steps of construction :

Step I : Draw $CD = 4.1$ cm.

Step II : With C as the centre and radius 7.3 cm, draw an arc.

Step III : With D as the centre and radius 3.5 cm, draw an arc to intersect the arc drawn in Step II at A.

Step IV : With D as the centre and radius 3.2 cm, draw an arc on the other side of AC.

Step V : With C as the centre and radius 2.5 cm, draw an arc to intersect the arc drawn in Step IV at B.

Step VI : Join BA, DA, BC and BD and AC to obtained the required quadrilateral.

Practical Geometry (constructions) Ex 18.2 Q5

Answer :

Steps of construction :

Step I : Draw $AB = 5.5$ cm.

Step II : With A as the centre and radius 7.1 cm, draw an arc.

Step III : With B as the centre and radius 2.5 cm, draw an arc to intersect the arc drawn in Step II at C.

Step IV : With B as the centre and radius 8 cm, draw an arc.

Step V : With A as the centre and radius 5 cm, draw an arc to intersect the arc drawn in Step IV at D.

Step VI : Join DA, DB, BC, AC and CD to obtained the required quadrilateral.

Practical Geometry (constructions) Ex 18.2 Q6

Answer :

Steps of construction :

Step I : Draw $BC = 4$ cm.

Step II : With B as the centre and radius 6.5 cm, draw an arc.

Step III : With C as the centre and radius 5 cm, draw an arc to intersect the arc drawn in Step II at D.

Step IV : With C as the centre and radius 5.6 cm, draw an arc on the same side .

Step V : With D as the centre and radius 4.5 cm, draw an arc to intersect the arc drawn in Step IV at A.

Step VI : Join BA, AC, DA, BD and CD to obtained the required quadrilateral.
