

Profit, Loss, Discount, Value Added Tax (VAT) Ex 13.2 Q20

Answer :

Given,

$$\text{Gain on one cycle} = \text{Rs. } 360$$

$$\text{Gain} = 20\%$$

$$\text{Gain \%} = \frac{\text{Gain}}{\text{CP}} \times 100$$

$$20 = \frac{360}{\text{CP}} \times 100$$

$$\text{CP} = \text{Rs. } 1800$$

$$\text{SP} = \frac{100 + \text{Gain \%}}{100} \times \text{CP}$$

$$\text{SP} = \frac{120}{100} \times 1800 = \text{Rs. } 2160$$

$$\text{SP} = \text{Rs. } 2160$$

$$\text{Discount} = 20\%$$

$$\text{MP} = \frac{100 \times \text{SP}}{100 - \text{Discount \%}}$$

$$\text{MP} = \frac{100 \times 2160}{80} = \text{Rs. } 2700$$

Hence, the MP of one cycle is Rs. 2700.

Profit, Loss, Discount, Value Added Tax (VAT) Ex 13.2 Q21

Answer :

Given,

$$\text{CP of the suit} = \text{Rs. } 1470$$

$$\text{Gain} = 10\%$$

$$\text{So, SP} = \text{Rs. } \left(\frac{100 + \text{Gain}}{100} \times \text{CP} \right)$$

$$= \text{Rs. } \left(\frac{100 + 10}{100} \times 1470 \right)$$

$$= \text{Rs. } 1617$$

Now,

$$\text{SP} = \text{Rs. } 1617$$

$$\text{Discount} = 12.5\%$$

$$\text{So, MP} = \text{Rs. } \left(\frac{100 \times \text{SP}}{100 - \text{Discount \%}} \right)$$

$$= \text{Rs. } \left(\frac{100 \times 1617}{100 - 12.5} \right) = \text{Rs. } 1848$$

Therefore, the marked price of the suit is Rs. 1848.

***** END *****
