

Exercise 14B

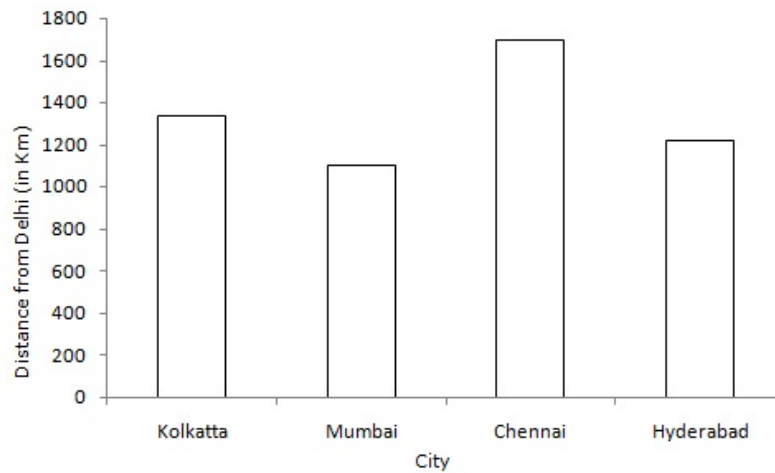

Question 9:

Take city along the x-axis and distance from Delhi (in Km) along the y-axis.

Along the y-axis, take 1 big division = 200 units.

All the bars should be of same width and same space should be left between the consecutive bars.

Now we shall draw the bar chart, as shown below:

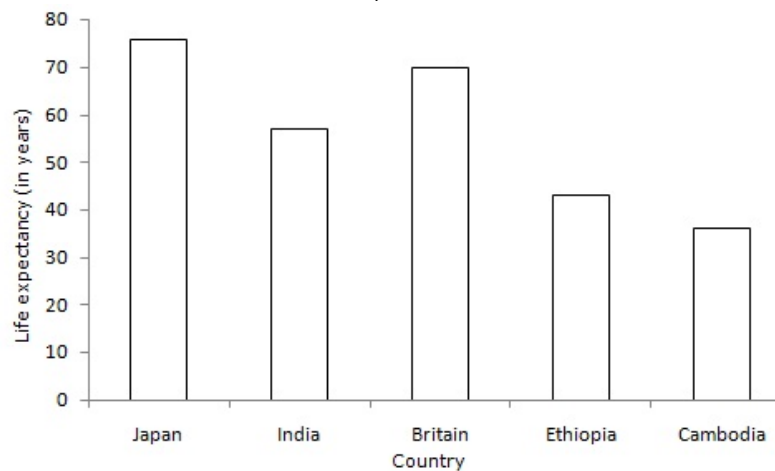

Question 10:

Take Country along the x-axis and Life expectancy (in years) along the y-axis.

Along the y-axis, take 1 big division = 10 units.

All the bars should be of same width and same space should be left between the consecutive bars.

Now we shall draw the bar chart, as shown below:
