

Exercise 20

Q1

Answer :

(d) four lines of symmetry

Q2

Answer :

(c) a line joining the midpoints of its opposite sides

Q3

Answer :

(b) each of its diagonals

Q4

Answer :

(d) an unlimited number of lines of symmetry

This is because a circle has infinite number of diameters. Also, a circle is symmetrical about each of its diameter.

Q5

Answer :

(a) no line of symmetry

Q6

Answer :

(a) the diagonal AC

Q7

Answer :

(c) two lines of symmetry
