

Q22. From the following information calculate Gross Profit Ratio, Inventory Turnover Ratio and Trade Receivables Turnover Ratio

Revenue from operations	3,00,000				
Cost of Revenue from operations	2,40,000				
Inventory at the end	62,000				
Gross Profit	60,000				
Inventory in the beginning	58,000				
Trade Receivables	32,000				
Solution:					
Gross Profit Ratio = $\frac{\text{Gross Profit}}{\text{Net Revenue from Operations}} \times 100$					
Gross Profit Ratio = $\frac{60,000}{3.00,000} \times 100 = 20\%$					
Inventory Turnover Ratio = Cost of Revenue from Operations Average Inventory					
Average Inventory = Inventory in the begining + Inventory at the end					
2					
$=\frac{58,000+62,000}{2}$					
= 60,000 2.40.000					
Inventory Turnover Ratio = $\frac{2,40,000}{60,000}$ = 4 Times					
Trade Receivables Turnover Ratio = $\frac{\text{Net Revenue from Operations}}{\text{Average Trade Receivables}}$ = $\frac{3,00,000}{32,000} = 9.4 \text{ Times}$					
	32,000				

Note: No information is given in the question about opening and closing balance of trade receivable. Hence, trade receivables given in the question is assumed to be Average Trade Receivables.
