

Pair of Linear Equations in Two varibles Ex 3.11 Q3 Answer:

Let the length and breadth of the rectangle be x and y units respectively

Then, area of rectangle = xy square units

If the length is increased by ${\bf 3}$ meters and breath is reduced each by ${\bf 4}$ square meters the area is reduced by ${\bf 67}$ square units

Therefore,

$$xy - 67 = (x+3)(y-4)$$

$$xy - 67 = xy + 3y - 4x - 12$$

$$yy - 67 = yy + 3y - 4x - 12$$

$$4x - 3y - 67 + 12 = 0$$

$$4x - 3y - 55 = 0 \cdots (i)$$

Then the length is reduced by 1 meter and breadth is increased by 4 meter then the area is increased by 89 square units

Therefore, $0 = 4x - y - 93 \cdots (ii)$

Thus, we get the following system of linear equation

$$4x - 3y - 55 = 0$$

$$4x - y - 93 = 0$$

By using cross multiplication we have

$$\frac{x}{(-3\times-93)-(-1\times-55)} = \frac{-y}{(4\times-93)-(4\times-55)} = \frac{1}{(4\times-1)-(4\times-3)}$$

$$\frac{x}{279-55} = \frac{-y}{-372+220} = \frac{1}{-4+12}$$

$$\frac{x}{224} = \frac{\cancel{y}}{\cancel{\cancel{y}}152} = \frac{1}{8}$$

$$x = \frac{224}{8}$$

$$x = 28$$

and

$$y = \frac{152}{8}$$

$$y = 19$$

Hence, the length of rectangle is 28 meter,

The breath of rectangle is 19 meter.

Pair of Linear Equations in Two varibles Ex 3.11 Q4

Answer:

Let the income of X be $\mathrm{Rs}\,8_X$ and the income of Y be $\mathrm{Rs}\,7_X$ further let the expenditure of X be 19y and the expenditure of Y be 16y respectively then,

Saving of
$$x = 8x - 19y$$

Saving of
$$y = 7x - 16y$$

$$8x - 19y = 1250$$

$$7x - 16y = 1250$$

$$8x - 19y - 1250 = 0 \cdots (i)$$

$$7x - 16y - 1250 = 0 \cdots (ii)$$

Solving equation (i) and (ii) by cross-multiplication, we have

$$\frac{x}{(-19\times-1250)-(-16\times-1250)} = \frac{-y}{(8\times-1250)-(7\times-1250)} = \frac{1}{(8\times-16)-(7\times-19)}$$

$$\frac{x}{23750-20000} = \frac{-y}{-10000+8750} = \frac{1}{-128+133}$$

$$\frac{x}{3750} = \frac{y}{1250} = \frac{1}{5}$$

$$x = \frac{3750}{5}$$

The monthly income of X = 8x

$$= 8 \times 750$$

$$=6000$$

The monthly income of Y = 7x

$$= 7 \times 750$$

$$=5250$$

Hence the monthly income of X is Rs Rs. 6000

The monthly income of y is Rs Rs. 5250

****** END ******
