

Exercise 14E

Question 5:

Mean salary of 20 workers = Rs.7650

Total salary of 20 workers = Rs (7650×20) = Rs. 153000.

Now if managers salary is added mean becomes Rs. 8200

- \therefore Total salary of 20 workers + manager's salary= Rs.(8200 x 21)
- = Rs. 172200
- .: Manager's salary per month
- = Total salary of 20 workers and the Manager Total salary of 20 workers
- = Rs(172200 153000)
- = Rs.19200

Question 6:

Mean monthly wage of 10 persons = Rs.9000

Total monthly wage of 10 persons= $Rs (9000 \times 10)$

= Rs. 90000

New mean monthly wage

[(totalmonthly wage of 10 persons) – (wages of worker who left) + = (wages of worker who joined)]

$$\frac{10}{10} = \frac{\text{Rs.}90000 - \text{Rs.}8100 + \text{Rs.}7200}{10} \\
= \text{Rs.} \left(\frac{89100}{10}\right) = 8910$$

: Thenew monthly average wage = Rs 8910

********* END ********
